

2025 High School Discussion Meet Questions

1. What are ways for young farmers and ranchers to be competitive in today's market?
2. There seems to be a gap of knowledge and understanding between those in agriculture and those outside of agriculture. What information and methodology would best help bridge the gap to increase agriculture support in cities and political arenas?
3. As the future of agriculture, what is the best step forward in agriculture, self employment or to be Employed in agriculture.
4. As "regenerative agriculture" is becoming more common, how can Farm Bureau provide the resources for farmers to try some of these practices without risking too much profit?
5. What are some key issues facing farmers in our state, and how can the farm bureau address these challenges to support the sustainability and growth of local agriculture?
