MOVING AGRICULTURE TO THE CLASSROOM

WHAT IS THE MAC TRAILER?

This fun packed trailer is funded by the Idaho Farm Bureau Federation and brings a fun and interactive experience for children to learn more about agriculture.

PURPOSE

While agriculture is growing as an industry, children's understanding of where their food and fiber come from is gradually diminishing. In the old days, if you asked a child where butter comes from, they would have pointed to the cow in the pasture because they had seen the cow milked and the butter churned. Today, a growing number of children may think no further than the refrigerated section at the grocery store. It just takes a little education and perhaps a little fun to help us all realize how connected we are to farms & ranches.

HAVE THE MAC TRAILER COME TO YOUR SCHOOL OR EVENT

Lessons are targeted toward grades K-5 and lessons times can be flexible.

Some lesson examples include:

- Dairy
- Wheat
- Apples
- Waterways
- Beef
