

## Weekly Hay Report May 9, 2022

First crop hay is all the talk now as the Dairies and Exporters have been more aggressive this past week. What we are hearing is that Hay is Hay is Hay and the bids are running in the \$300 area for clean and green. There will be discounts depending on just how much rain one receives before it is baled. The way things are in some areas a producer may take a little less for their hay if they could just get some rain.
