

Weekly Hay Report June 3, 2019

The hay market was very slow this past week with very little hay contracting. The weather is forecast to be hot and dry giving the crop a chance to grow and producers the opportunity to cut first crop. Expectations are that first crop in some areas will be good hay for the export market grading good. Supreme hay in western Idaho contracting at \$200 to \$220 at the stack for nearby delivery. New crop Premium / Supreme in Southwest Idaho contracting at \$195 in the stack. Good hay contracting at \$160.
